

Hasini Nikesala

Software Engineer Intern | Full-Stack Developer

Anuradhapura, Sri Lanka | +94 76 299 4193 | hasineenikesala@gmail.com LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Highly motivated and analytical Information Systems Undergraduate with hands-on experience in full-stack software development, architectural design patterns, and database optimization. Demonstrates a verified capability to design scalable web architectures, integrate secure APIs, and implement responsive interfaces utilizing the MERN stack, PHP, Spring Boot, and cloud ecosystems. Proven team collaborator and problemsolver with a strong background in competitive hackathons and agile software delivery. Eager to leverage strong object-oriented programming foundations and robust full-stack engineering principles in a Software Engineering Internship to deliver enterprise-grade performance solutions.

TECHNICAL SKILLS MATRIX

- Programming Languages: Java, PHP, Python, TypeScript, JavaScript, SQL, HTML5, CSS3
- Frontend Engineering: React.js, Angular, Tailwind CSS, Bootstrap, JavaScript (ES6+), DOM Manipulation
- Backend & API Engineering: Node.js, Express.js, Spring Boot, RESTful API Architecture, MVC Architecture
- Databases & ORM: MySQL, MongoDB, Relational & NoSQL Database Design, Hibernate, JPA
- Tools & Developer Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, .NET, Maltego, Linux OS

PROFESSIONAL EXPERIENCE

Web Developer Intern Nov 2025 – Feb 2026
Devora (Pvt) Ltd

- Collaborated with senior engineers to construct and optimize responsive web modules utilizing frontend frameworks and backend scripting architectures.
- Contributed to database schemas optimization and designed efficient queries to ensure seamless data rendering.
- Conducted component-level debugging, cross-browser compatibility testing, and localized script execution parameters.

FEATURED TECHNICAL PROJECTS

TenderAI – AI-Powered Government Tender Intelligence Platform Mar 2026 – Present
Team Member – ApexForge | React, Next.js, FastAPI, PostgreSQL, AWS, Vector Databases, Generative AI

- Co-architected an AI-driven B2B SaaS system facilitating automated public tender discovery and regulatory compliance auditing for local SMEs.
- Integrated semantic vector search models and generative AI tokens to dynamically generate complex corporate proposal templates.
- Developed an scalable technical layout connecting a state-managed React frontend with an elastic, AWS-hosted FastAPI backend ecosystem.

Watch Sale E-Commerce Web Application Apr 2026 – May 2026
Full-Stack Developer (Individual Project) | GitHub | React.js, Node.js, Express.js, MongoDB, Git, Tailwind CSS

- Engineered an asynchronous, end-to-end e-commerce platform linking modern customer storefront flows to secure backend tracking microservices.
- Built highly responsive, reusable functional components in React.js coupled with state-driven modular RESTful endpoints using Node.js/Express.js.

- Modeled an un-normalized MongoDB document schema ensuring minimal execution latencies and fluid data mutations during heavy traffic simulations.

Blood Bank and Donor Management System

Apr 2025 – May 2025

Full-Stack Developer (Individual Project) | GitHub | *PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap*

- Programmed a comprehensive web dashboard tracking real-time blood bank inventory metrics, clinical profiles, and urgent donation center updates.
- Designed structured relational schemas in MySQL using secondary indices to remove structural record duplications and accelerate execution queries.
- Built client-side request verifications using vanilla JavaScript alongside object-oriented PHP validation mechanisms on the server side.

IoT-Based Environment Control System

Jan 2026 – Mar 2026

IoT & Integration Specialist (Group Project) | GitHub | *Python, Embedded Scripting, Hardware Telemetry, System Testing*

- Co-designed an integrated embedded monitoring pipeline utilizing network sensor Arrays and wireless telemetry parsing layers.
- Formulated custom scripts in Python to continuously clean and ingest remote sensor inputs, maintaining zero data packet drop rates during telemetry runs.
- Authored systematic unit test suites evaluating wireless transport protocols and physical micro-controller hardware boundaries under load.

Study Buddy App

Dec 2025 – Jan 2026

Full-Stack Developer (Individual Project) | GitHub | *TypeScript, CSS3, Software Layout Design*

- Designed a lightweight, modular task organization environment engineered to foster real-time student group task allocations and milestone tracking.
- Leveraged TypeScript structural typing paradigms to eliminate compilation errors and ensure high runtime efficiency and modular code reusability.

HACKATHONS & COMPETITIONS

- Code Sprint 11 Participant (IIT University) – Represented Team ApexForge in a high-stakes nationwide sprint, engineering the comprehensive SaaS platform schema and technical implementation architecture for TenderAI.
- Bitcode V5.0 Competitor (Rajarata University of Sri Lanka) – Successfully qualified for and competed in the high-intensity preselection marathon, solving advanced algorithmic and logical problems under competitive time limits.

CERTIFICATIONS

- MERN Stack Development Certified Professional – Institute of Digital Engineering Technology
- Web Development and Python Engineering Course – University of Moratuwa (2025)
- AI/ML Engineer Program (Stage 1 & Stage 2) – Sri Lanka Institute of Information Technology (SLIIT) (2025)
- Cybersecurity & Ethical Hacking Advanced Frameworks – E-Nenasala Peradeniya
- Cloud Operations & AWS Topologies – Institute of Digital Engineering Technology (In Progress)

EDUCATION

Rajarata University of Sri Lanka

Feb 2023 – Present

Bachelor of Science Honours in Information Systems

Current GPA: 3.49 / 4.00

- Expected Graduation: 2027
- Relevant Coursework: Software Engineering, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures & Algorithms (DSA), Web Application Development, System Analysis and Design.

LEADERSHIP & VOLUNTEER EXPERIENCE

- Event Coordinator – BITCODE (Rajarata University of Sri Lanka) – Directed logistical operations, code environment management, and technical coordination parameters for the multi-tiered university coding challenge.
- Committee Member – Computer Science & Information Systems Association (BITSA) – Spearheaded knowledge sharing sessions, technology workshops, and student networking forums across the faculty.
- Active Committee Member – Gavel Club (RUSL) – Chaired multiple communication skills development programs and structured impromptu speech panels to enhance public presentation competencies.
